

# CLOUD SERVICES & SOLUTIONS

## DIGITAL PLATFORMS FOR YOUR BUSINESS

The team at Lexel know cloud inside out. We'll recommend solutions and services that deliver best value to your organisation, both now and in the future.

The cloud presents an overwhelming range of benefits and risks to businesses. Through our extensive range of cloud services and solutions, the team at Lexel delivers peace of mind for your cloud journey; our experienced team implementing cloud solutions to global best practice standards.

At Lexel, we'll make sure you are fully informed when it comes to cloud decisions. We work with our customers to see the big picture, so you'll have the added advantage of clearly understanding the benefits and the risks associated with moving workloads to the cloud.

Lexel have been great about suggesting ways to improve our structure and system security and backups. When it comes to IT support, they really offer a pro-active and complete solution.

### CLOUD BENEFITS

**Cost effective.** Because cloud solutions scale with your business needs, buy only what you need, as and when you need it.

**Predictable.** In one simple monthly fee, know what you're paying for and when you're paying for it.

**Secure.** Cloud solutions include a breadth of security and compliance measures, providing the ultimate in business certainty.

**Reliable.** Cloud services are highly available and supported by vendor Service Level Agreements (SLAs).

**Accessible.** Access work information from anywhere anytime, and from any device.

### Our services include:

**Readiness.** Lexel will work with your business to develop a roadmap for cloud adoption, including clear and measureable business outcomes.

**Disaster recovery.** In the event of a disaster, Lexel's cloud based DR solutions will ensure your business is up and running again quickly, with minimal disruption.

**Microsoft cloud.** Lexel's experienced team can help with all components of your cloud migration for Microsoft Office 365, Exchange Online, Power BI, Azure, Microsoft Teams, Skype for Business and SharePoint online.

**Public cloud.** Consulting, implementation and migration services for public cloud are all available through the knowledgeable team at Lexel.

**Private cloud.** A customised solution for customers requiring dedicated cloud infrastructure.

**Infrastructure.** Managed and hosted infrastructure, including data centre, storage and compute.

**Virtual servers.** Access virtual servers from Lexel's shared private cloud platform, or offshore through Microsoft Azure or Amazon Web Services.

**Virtual applications and desktops.** Access virtual apps, desktops and data from any device, on any platform.

**Skype for Business.** In addition to Skype for Business solutions for corporate and enterprise, Lexel offers a locally hosted and supported Skype for Business solution, designed for customers with less than 100 desktops.

**Microsoft Azure, AWS and Google.** Lexel can help you take advantage of hundreds of services through Microsoft Azure, Amazon Web Services and Google Cloud.

**Mobile device management.** Lexel can centralise the management of mobile devices, traditional desktops, laptops and more through Citrix Cloud.

**WAN and internet.** Whether you need to connect several sites locally, or to locations further afield, the Lexel team has the skills and expertise to help with WAN and internet.

**Software licensing.** Lexel's experienced team can support your business with licensing, provisioning, management and support. Lexel is an established Microsoft Cloud Solution Provider (CSP).
